ABOUT US

A transport plan for your cargo.

ASİLPORT Logistics is an international logistics and transport business based in Mersin, Türkiye. We focus on freight requirements from across Türkiye towards Europe, the Balkans, the Middle East, the Gulf and Central Asia. Our services include refrigerated, curtainsider, flatbed and container transport, alongside ocean freight and project cargo.

Understand the cargo	Cargo type, dimensions, weight and any special transport requirements are considered together.
Define the route	Transport options are assessed against the origin, destination and requested dates.
Talk directly	Contact our Mersin office 24/7 to share your cargo and route details.

LOGISTICS SOLUTIONS

Road transport for your cargo.

Refrigerated transport

Transport options for temperature-controlled cargo. Product type, temperature requirements and loading conditions are assessed for each enquiry.

Temperature requirements · Cargo conditions

Curtainsider transport

Curtainsider options matched to the load and loading method. Dimensions, weight and route information form the basis of the transport plan.

Cargo dimensions · Loading method

LOGISTICS SOLUTIONS

Container and ocean freight solutions.

Container transport

Planning for containerised cargo that considers origin, destination and connecting points together. Suitable operating conditions are clarified for each enquiry.

Container details · Connecting points

Ocean freight

Ocean freight options for international cargo. Ports, cargo readiness and operational requirements are considered together.

Ports · Operational planning

LOGISTICS SOLUTIONS

Planning for special cargo.

Flatbed transport

Open vehicle options based on cargo characteristics and loading requirements. Dimensions, weight and the loading method guide the transport plan.

Dimensions and weight · Loading method

Project cargo

Planning for project loads that require assessment beyond a standard shipment. Technical cargo details, routing and operating conditions are reviewed individually.

Technical cargo details · Routing

LOGISTICS SOLUTIONS

A suitable plan for every shipment.

Cargo type, dimensions and weight are reviewed together with the origin, destination and requested dates. Vehicle options and operating conditions are clarified using these details. Share your cargo requirements so we can assess the transport options together.

Vehicle images are illustrative visuals created to present transport services.

SERVICE REGIONS

From Türkiye to international markets.

We assess transport requirements from across Türkiye towards these regions.

MERSIN · TÜRKİYE

Europe

The Balkans

The Middle East

The Gulf

Central Asia

Country and route availability are confirmed for each enquiry. Service scope, pricing and delivery conditions are agreed after reviewing your requirements.
